Memory Notebook of Nursing: Pharm & Diagnostics

Antibiotics/Antivirals

1. Aminoglycosides
2. Amoxicilin (Amoxil)
3. Ancef and Kefzol
4. Anitretrovirals
5. Azithromycin (Zithromax)
6. The Azoles
7. Ceftriaxone (Rocephin)
8. Cephalosporins
9. Ciprofloxacin (Cipro)
10. Gatifloxacin (Tequin)
11. Isoniazid (INH)
12. Metronidazole (Flagyl)
13. Penicillin - Uses and Side Effects
14. Tetracycline Uses

Antineoplastic

15. Chlorambucil (Leukeran)

Cardiovascular

16. ACE Inhibitors
17. Amiodarone (Cordarone)
18. Antidysrhythmics
19. Antihypertensives
20. Cholestyramine Resin (Questran)
21. Digitalis
22. Fosinopril (Monopril)
23. Gemfibrozil (Lopid)
24. Nitroglycerin

Respiratory

25. Antihistamines
26. Antitussives, Expectorants, and Mucolytics
27. Bronchodilators
28. Cetirizine (Zyrtec)
29. Pulmicort (Budesonide)

Gastrointestinal

30. Aluminum Hydroxide (Amphojel)
31. Antidiarrheals
32. H₂ Blockers
33. Kayexalate
34. Lactulose

35. Magnesium Hydroxide (Milk of Magnesia)
36. Metoclopramide (Reglan)
37. Proton Pump Inhibitors
38. Prochlorperazine (Compazine)
39. Promethazine (Phenergan)
40. Psyllium (Metamucil)

Diuretics

41. Bumetanide (Bumex)
42. Diuretic Water Slide
43. Osmitol (Mannitol)
44. Spironolactone (Aldactone)

Psychotherapeutic

45. Bupropion (Wellbutrin and Zyban)
46. Chlorpromazine (Thorazine)
47. Haloperidol (Haldol)
48. MAO Inhibitors
49. SSRIs
50. Tricyclic Antidepressants

Endocrine

51. Acarbose (Precose)
52. Corticosteroids
53. Glimepiride (Amaryl) and Glipizide (Glucotrol)
54. Glucagon
55. Insulin: Types, Onset, and Peaks
56. Rapid Acting Insulin
57. Levothyroxine (Synthroid)
58. Methimazole (Tapazole)
59. Sulfonylureas

Anticoagulants, Antiplatelets, and Thrombolytics

60. Clopidogrel (Plavix)
61. Epoetin Alfa (Procrit)
62. Heparin (The Clotting Roundup)
63. Heparin-Coumadin Tests
64. Iron Supplements
65. Thrombolytics
66. Warfarin (Coumadin)

Analgesics and NSAIDs

67. Analgesics
68. Aspirin
69. Morphine Sulfate
70. Naloxone (Narcan)
71. NSAIDs

Neurologic and Sensory

- 72. Antiepileptic Agents
- 73. Benztropine (Cogentin)
- 74. Carbamazepine (Tegretol)
- 75. Clonazepam (Klonopin)
- 76. Gabapentin (Neurontin)
- 77. Timolol (Timoptic)
- 78. Topical Vasoconstrictors

Musculoskeletal

- 79. Antigout
- 80. Bisphosphonates
- 81. Calcitonin - Salmon (Calcimar)
- 82. Calcium Supplements (Oral)
- 83. Celecoxib (Celebrex)
- 84. Etodolac (Lodine)

Reproductive

- 85. Erectile Dysfunction Drugs
- 86. Medroxyprogesterone (Depo-Provera)
- 87. Uterine Relaxants (Tocolytics)
- 88. RhoGAM
- 89. Oxytocin (Pitocin)
- 90. Tolterodine (Detrol)

Miscellaneous

- 91. Azathioprine (Imuran)
- 92. Drug Interactions and Grapefruit
- 93. Midazolam (Versed)
- 94. Phenazopyridine (Pyridium)
- 95. Potassium Chloride (IV and PO)
- 96. Pre-Op Meds: Vistaril and Ativan

Laboratory Cultures

- 97. Blood Culture
- 98. Sputum Culture
- 99. Stool Culture
- 100. Throat Culture
- 101. Urine Culture
- 102. Wound Culture

Laboratory Blood Tests

- 103. Ammonia Level
- 104. Blood Urea Nitrogen (BUN)
- 105. Creatinine and Creatinine Clearance
- 106. Fibrinogen

107. Gamma-Glutamyl Transferase (GGT)
108. Hematocrit
109. Hemoglobin
110. Lipoproteins
111. Platelet Count
112. Potassium (Serum)
113. Prostate Specific Antigen (PSA)
114. Prothrombin Time (PT) and INR
115. PTT and APTT
116. Digoxin Level
117. Lipase and Amylase (Serum)
118. Sodium and Chloride (Serum)
119. TORCH screening
120. Type and Crossmatch Blood
121. White Blood Cells (WBC) Count

Diagnostic Tests

122. Bone Densitometry (Bone Mineral Density)
123. Bronchoscopy
124. Chorionic Villus Sampling (CVS)
125. Occult Blood
126. Spinal Fluid Analysis

ANTI-GOUT!

I am Antigout I sing
I give my action to decreasing uric acid
And stopping pain is my thing.

I block renal uptake of uric acid.
I inhibit inflammation & reduce pain & swelling.
I decrease uric acid levels by interrupting production.

We work together or alone to reverse the symptoms.

Probenecid (Benemid)
Colchicine
Allopurinol (Zyloprim)

Side Effects Common To All:

- GI Upset
- Diarrhea
- Abdominal pain
- Anorexia

Benemid: Headache, rash, kidney stones

Colchicine: GI problems are common, use with caution in elderly

Zyloprim: Fever, rash can be serious

Gout of there, gout of there, heh heh, just a little play on words...
